

22ND AUG. TO 24TH AUG. 2016

Started and supported by UBM India, a B2B exhibition connecting the Indian Food Manufacturers & Processing Industry

Camlin Fine Science is a regular participant at Fi across the globe. This year at Pragati Maidan, Delhi, the booth was visited by snack manufacturers, oil and fat manufacturers, Traders & Dealers, food industries, food ingredients manufacturers & dealers etc. from north, Central, Eastern belt of India. However, Fi- Delhi, didn't give us the expected response.

Understanding the market needs, we developed a unique blend which met the expectation of frying industry - **Xtendra 06** [T2210]. Fi was a good platform to promote it and create awareness among our customers on enhancing their product shelf life.

Though CFS is a known brand in this space, our presence in antioxidant blends was fairly new to many of the visitors.
